## PROFESSIONAL SUMMARY

Computer Engineering graduate with hands-on experience in full-stack MERN development, REST APIs, and AI-powered web applications. Currently working as an AI Full Stack Engineer Intern, with experience in LLM integrations, AI-assisted development, and building scalable software solutions.

## INTERNSHIP

**AI Full Stack Engineer Intern** | *S3B Global Technologies LLP*    Sep 2026 – Present

- Contributing to AI-powered full-stack applications using React.js, Node.js, REST APIs, LLM integrations, and AI-assisted development workflows.
- Developed and evaluated POCs, tested application features, debugged issues, and collaborated with the development team on AI-driven solutions and technical documentation.

## SKILLS

**Languages:** Java, JavaScript (ES6+), SQL, HTML5, CSS3

**Technologies:** React.js, Tailwind CSS, Node.js, Express.js, REST APIs, JWT Authentication, MongoDB, MySQL

**Concepts:** DSA, OOP, DBMS, OS, Computer Networks, MVC Architecture

**Tools & Deployment:** Git, GitHub, Postman, VS Code, npm, Vercel, Netlify, Render, Railway, MongoDB Atlas

## PROJECTS

**SkillSynapse AI** | *React.js, Node.js, Express.js, MongoDB, OpenAI API*    Jan 2026 – Apr 2026  
Live | GitHub

- Engineered a full-stack AI resume analysis platform integrating OpenAI APIs to reduce manual evaluation effort by 80% and deliver personalized career reports for 50+ users.
- Implemented JWT-based authentication, PDF parsing, and automated evaluation logic across 5+ scoring parameters with cross-device testing for reliable dashboard performance.

**ValidateAI** | *React.js, Node.js, Express.js, MongoDB, OpenAI API*    Jan 2026 – Apr 2026  
Live | GitHub

- Engineered a full-stack AI startup idea validator integrating OpenAI GPT-4o-mini to auto-generate 7-parameter validation reports — covering market analysis, competitor mapping, risk assessment, and profitability scoring — reducing manual research effort by 75%.
- Designed 4+ RESTful API endpoints with full CRUD operations, Mongoose-based MongoDB schemas, and real-time status tracking; deployed on Vercel with cross-device tested React UI.

**LeaveTracker** | *PHP, MySQL, JavaScript*    Aug 2025 – Dec 2025  
GitHub

- Architected a role-based Leave Management System using PHP and MySQL, systematizing approval workflows for 60+ faculty across 16 leave categories and digitizing institutional record tracking.
- Integrated scheduled notifications, PDF report generation, and Excel exports, cutting manual processing overhead by 60% across all departments.

## EDUCATION

**The Technological Institute of Textile and Sciences, Bhiwani**    Aug 2022 – May 2026  
*B.Tech in Computer Engineering* | CGPA: 8.0/10    Bhiwani, Haryana

**Govt. Model Sanskriti Sr. Sec. School, Bhiwani**    Mar 2022  
*Class XII (Science - PCM)*    70.8%

**Shishu Bharti High School, Bhiwani**    Mar 2020  
*Class X*    80.8%

## ACHIEVEMENTS

- Research Paper – COMPUTE-X 2026:** Showcased “An Automated Role-Based Leave Management System” at an international conference.
- Winner – Code War (Apr 2024):** Secured First Position among 60+ participants by applying strong problem-solving and advanced DSA skills under competitive time constraints.
